

How to download and install Clip Studio Paint 1.12.7

Updated Sept 28, 2022

Table of contents (click to jump through):

[Step by step how to install normally:](#)

[Removing the trial and getting EX!](#)

[Older versions backup](#)

[Possible fix fo Mac OS version 1.12.7](#)

Requirement:

- Internet access o.o
- Windows 10/11 64bit
- Trust me o.o

Step by step how to install normally:

1. Download installer for Clip Studio Paint 1.12.7

You can download from their website, or use these links to download the same version directly

[Download - Clip Studio Paint 1.12.7](#)

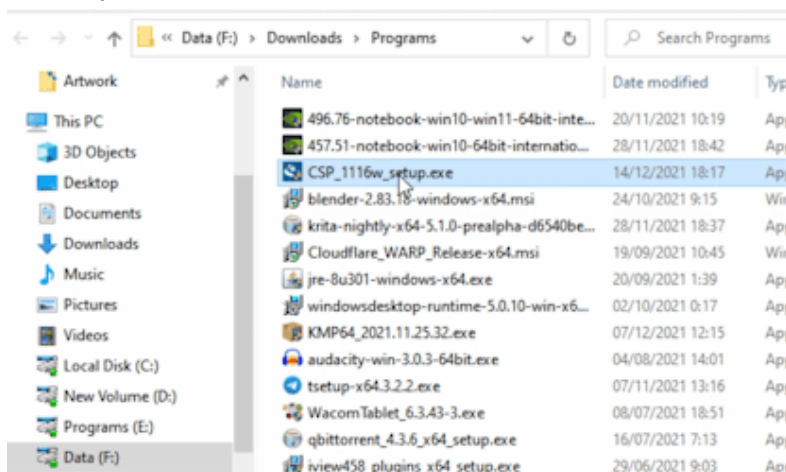

https://vd.clipstudio.net/clipcontent/paint/app/1127/CSP_1127w_setup.exe

2. Note:

- Those GIF are still 1.11.6, but it's exactly the same
- Trial fix on near bottom o.o Also possible fix for Mac on bottom

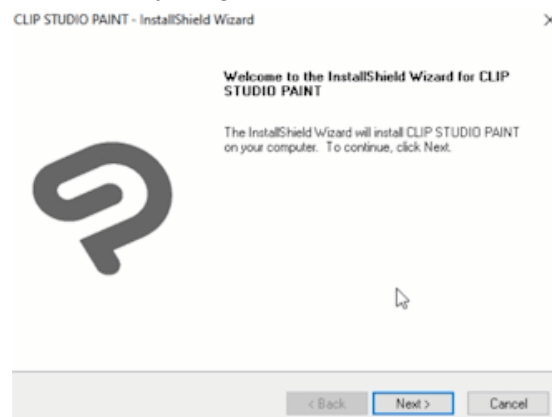

3. Wait for download complete then Run the installer

Locate your download location and open/run the file

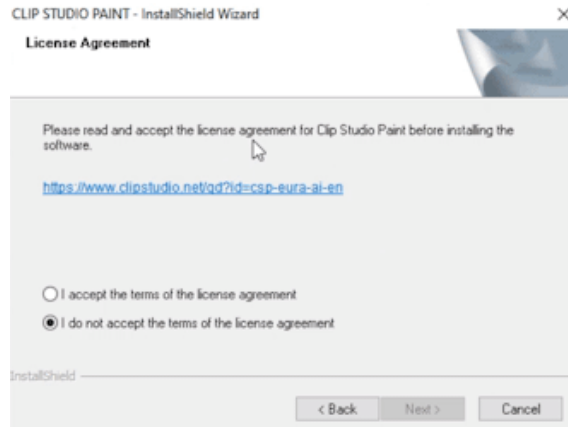

4. Welcome to Installer

Click next (on everything)

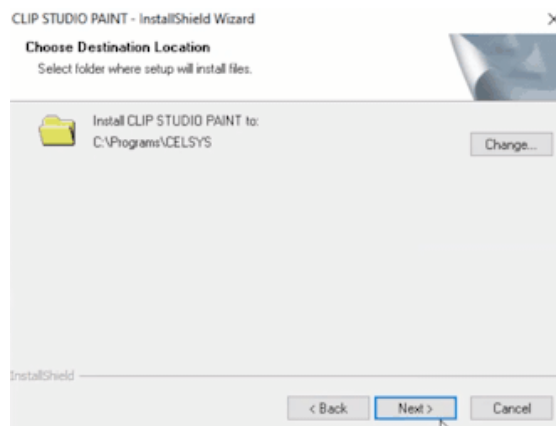

5. Licence Agreement

Accept the Licence Agreement and click next
You can't decline it if you want to install

6. Choose Destination Location

You can click Next directly if you want the default install location (C:\Program Files\). But you can change it anywhere you want, just click Change

7. Language Selection

Click Next, except if you are using Japanese or Chinese you need to read the instruction there

8. Click Install to begin the installation

Then wait till it complete

9. Complete and finish

By doing these steps, you have successfully download and install the latest version of Clip Studio Paint for free. You can do this anything, and it's legal o.o

FAQ:

Q: How about updating?

A: The process is exactly the same

Q: Do I keep the brushes and setting I have?

A: Yes, everything will be intact. No matter if you already delete or uninstall it, all brushes will be still available

Q: How to download the older version?

A: Using this link https://vd.clipstudio.net/clipcontent/paint/app/1116/CSP_1116w_setup.exe

You can modify the version number to any version number ("1116" equal to 1.11.6). So if you want to download 1.10.2, just change it to

https://vd.clipstudio.net/clipcontent/paint/app/1102/CSP_1102w_setup.exe

Q: Why is it a trial? Removing the trial and getting EX!

A: You must pass the trials to prove you are worthy!

Jk. If you don't have a license, it will be a trial. That means you can't save after the trial time ends. Follow the following guide to remove the trial limit while keeping all other features.

Reminder; you need to use the exact same version, so no need to update everytime there is an update o.o

By using this, you already know what you are doing here. This is not for selling, just for personal use to study purposes. Credit to Sakura on bbs.itzmx for all the good stuff!

It probably detect lot of virus, but I'm sure it's all false positive. Pretty common for this files. The source is same as all older version (for 2 years+), and it's the only crack available on whole internet, so it's the only choice you have for free stuff o.o You need to know how to whitelist/add exception to your antivirus. If you dont know, better if you just use legal stuff.

2. Open it using Winrar or 7zip or similar programs

Right click - Open

Then leave it open like that for a while

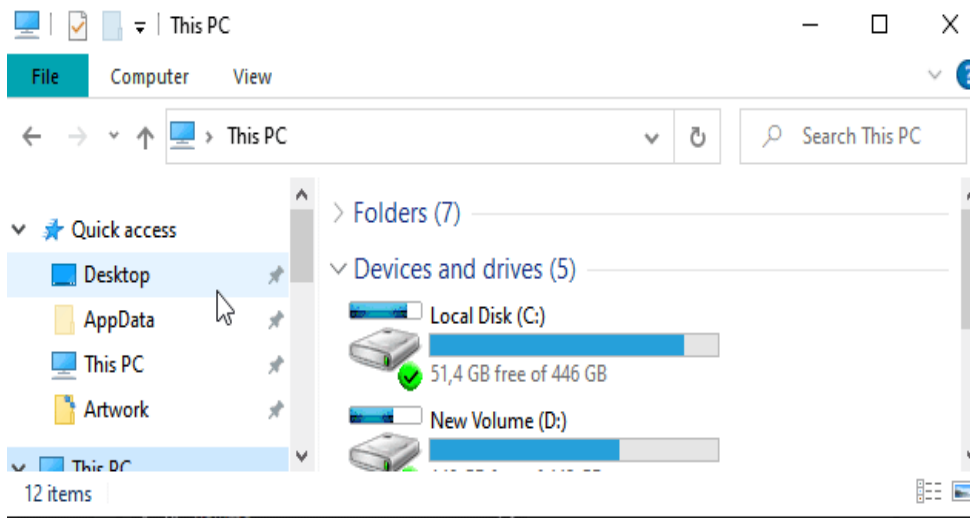

3. Locate a file named “CLIPStudioPaint” inside ClipStudioPaint folder

The default folder is here

C:\Program Files\CELSYS\CLIP STUDIO 1.5\CLIP STUDIO PAINT

You can access it by opening **File Explorer**, go to **C:**, open **Program Files** folder, open **CELSYS** folder, open **CLIP STUDIO 1.5**, then finally open **CLIP STUDIO PAINT** folder.

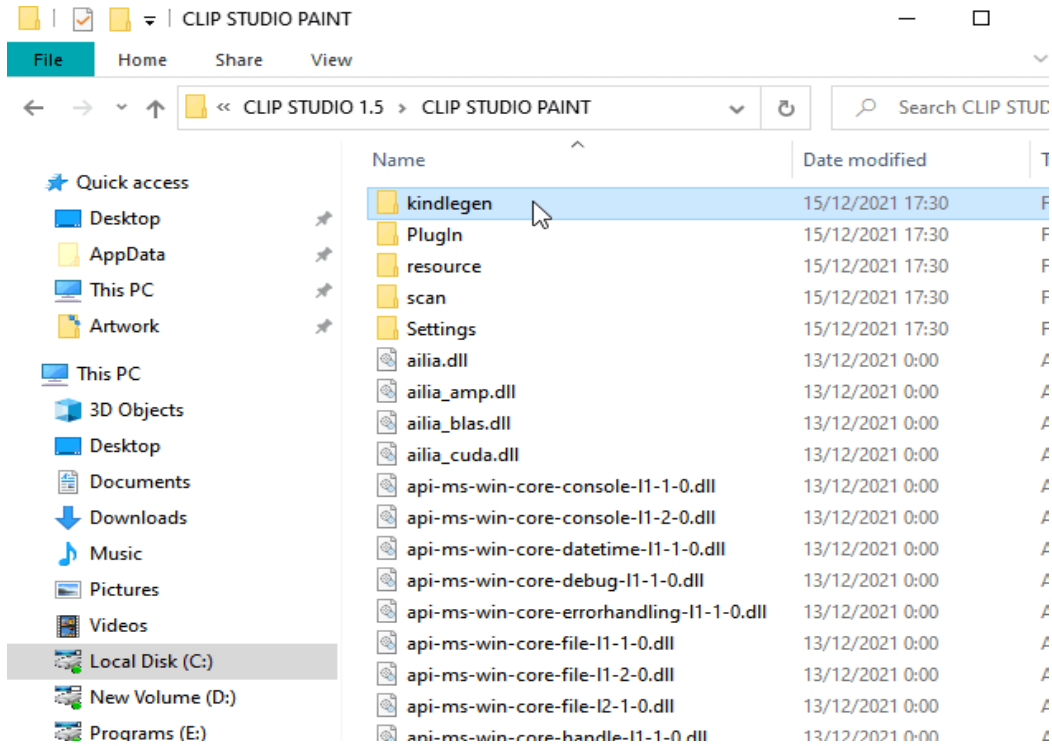

Note: You will NOT see any “CLIPStudio” file, only “CLIPStudioPaint”

Make sure you are in the correct folder, or it will mess up

If you change the install folder when installing, go to that folder

4. Delete “ClipStudioPaint” file inside “CLIP STUDIO PAINT” folder
that you opened on previous step

NOT “CLIP STUDIO”

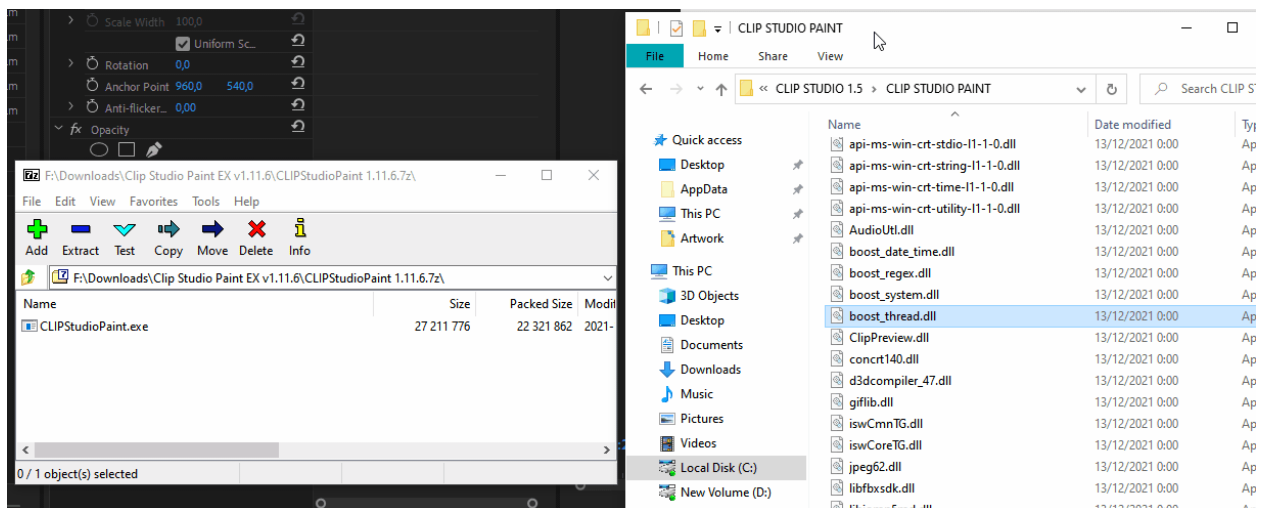

5. After you deleted the CLIPStudioPaint file,
open up the window from step 2, side by side like this.

Then **drag** the CLIPStudioPaint from 7zip/Winrar,
drop it to that folder (CLIP STUDIO PAINT).
Drop it to an empty place.

Basically we are moving the CLIPStudioPaint file we downloaded, into CSP folder

You should have these files visible: *boost_thread*, *ClipPreview*, and *CLIPStudioPaint*,
If not, then you are in the wrong folder, go back to step 3

6. FINISH, you have Clip Studio Paint EX for free without trial.
If you get some missing dll error when launching CSP, then you are in the wrong folder.
Go back to Step 3

FAQ2:

Q: Is it contain virus?

A: [VirusTotal](#) detected 3 from 69 scans. It's a false-positive. That means it's safe. No actual virus is in there. You can see one of them clearly says "HackTool.Crack", which means they detect it as a virus because it's a crack. This kind of thing is really common, so if you are really paranoid with such stuff, I don't recommend using crack and search free stuff.

All other crack you find will be the exact same, there is only one source available.

Source: <https://bbs.itzmx.com/forum.php?mod=viewthread&tid=100580&>

And it's the same source since early version 1.10, so I can say it's trustworthy

Q: Can I access materials and brushes?

A; Yes you can. You only need to login to your Clip Studio account. You can register for free without buying license

Older versions:

Biscuit/Crackers:

<https://drive.google.com/drive/folders/1Nupk8JPo5rNThum4bTeNAFvzADZe8a6Q?usp=sharing>

You need to use the exact same version. Here are installers for older versions. All links are going to official Clip Studio links.

Possible fix for Mac OS version 1.12.7

I'm not sure about this one though. Just find this source:

<https://github.com/lihaochen910/ClipStudioPaintForMacOS-Reverse-Engineering-Notes>

Read the guide there first (use google translate).

Maybe worth a try if you are fine with it. I can't test it because I don't have MacOS.
So far there are 5 comments said it work.

Step by step:

1. You need to install 1.12.7.

Copy this whole link to your browser, it will download pkg file, then install it

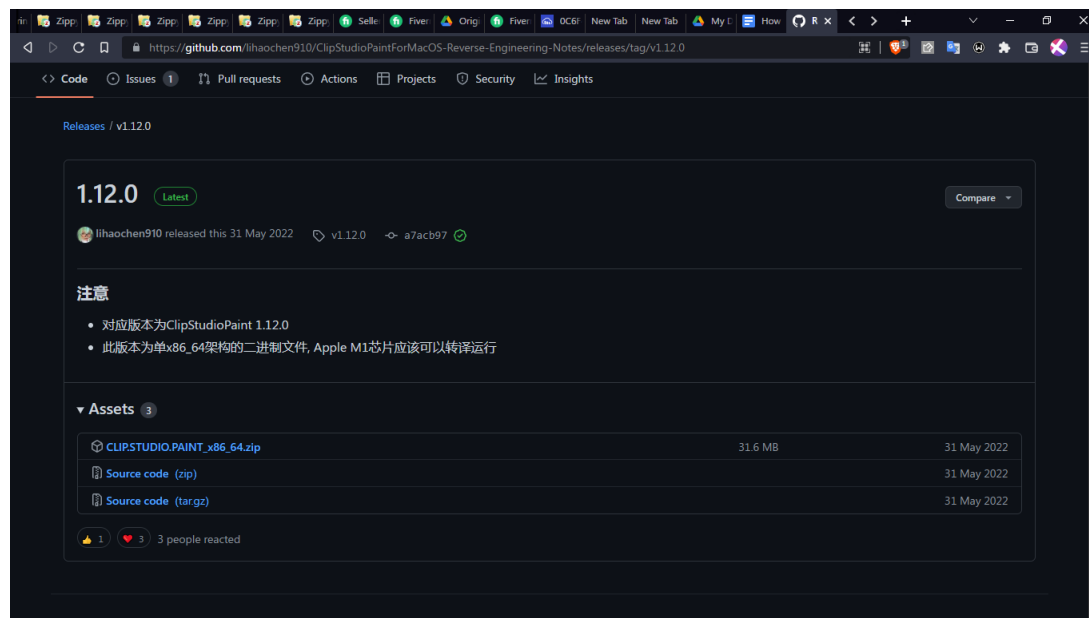

https://vd.clipstudio.net/clipcontent/paint/app/1127/CSP_1127m_app.pkg

Note: It's the same link as on the official site

2. Open up this link

<https://github.com/lihaochen910/ClipStudioPaintForMacOS-Reverse-Engineering-Notes/releases/tag/v1.12.7>

scroll down a bit, and click on **CLIP.STUDIO.PAINT_x86_64.zip** on **Asset menu**. This will download a file.

3. Find CLIP STUDIO PAINT.app in Finder and right-click to display the package content.
(The general path of CLIP STUDIO PAINT.app is at **/Applications/CLIP STUDIO 1.5/App/CLIP STUDIO PAINT.app**)

4. Go to **Contents -> MacOS** in turn, then replace CLIP STUDIO PAINT with the modified version
